## Work Experience

### Web Developer

2013 – 2014 / 2015 – 2016 / 2019 – Present

Future Access Inc. – St. Catharines, ON

- Primarily developed websites in the WordPress CMS. Developed with best practices in mind, using Hooks and Actions to tie directly into the WordPress Core
- Created dynamic, database driven websites using extended Wordpress functionality and plugins, such as Advanced Custom Fields
- Created custom user interfaces using jQuery for client-specific functions, such as a custom product builder for a medium sized furniture company
- Used SASS to rapidly and effectively style sites. Organizing stylesheets with mixins and variables
- Extended WooCommerce functionality by writing purpose-built code
- Debugged and provided support to clients websites when issues arose
- Used Agile project management strategy structure

### Web Developer

2014 – 2015 / 2016 – 2017

SynergyPro Solutions – Hamilton, ON

- Part of a development team for an object-oriented, page builder CMS driven by jQuery and PHP
- Worked mainly on database driven, inventory style websites using an in-house CMS
- Was the in-house WordPress developer for WordPress driven sites. Trained co-workers on best WordPress practices
- Participated in brainstorming sessions to better improve our websites and products

## Education
